Mr. Charles Myers
Route 2
Box 237
Culpeper, VA 22701

SEP 14 1992

Dear Mr. Myers:

The United States Environmental Protection Agency ("EPA") has completed an extensive sampling investigation of your property. EPA's findings have been compiled in the attached report. According to the report there is evidence that areas of buried metal objects exist. Due to the history of this property involving past burying of drums, there is reason to believe that these areas may contain additional drums not excavated during the previous drum removal action.

In an effort to further investigate this situation EPA has contacted Virginia Power. Virginia Power has agreed to investigate the possible additional drum locations and dispose of any drums found. EPA or an EPA over-site contractor will be present during Virginia Power's work on your property. The purpose of this letter is to ask for your permission to allow EPA, EPA's over-site contractor and Virginia Power access to the Site and to allow Virginia Power to investigate and then remove any buried drums if found.

Please sign and return the attached copy of this letter in the attached self-addressed postage paid envelope to indicate whether or not you will allow access to your property and allow Virginia Power to carry out this action. If you have any questions, feel free to contact me at (215) 597-8170.

Thank-you in advance for your cooperation in this matter.

Sincerely,

Terry Stilman, On-Scene Coordinator
Eastern Response Section
